

MPK49

49-KEY KEYBOARD CONTROLLER WITH MPC PADS

VERSATILE PERFORMANCE AND POWERFUL PRODUCTION. The MPK49 is a mid-sized, semi-weighted keyboard controller with MPC pads and technologies. You can use this USB/MIDI controller with virtually all audio software including DAWs, sequencers, and the included Ableton Live Lite software.

Its semi-weighted keys empower you with aftertouch for complete creative expression. In addition to its capabilities as a keyboard controller, the MPK49 has a full MPC-style production section with 12 genuine MPC pads that are velocity and pressure sensitive. You can control up to 72 different parameters via 24 assignable Q-Link knobs, faders, and buttons as well as optional footswitches.

A selection of MPC technologies are also built into the MPK49. MPC Note Repeat enables the MPK to automatically perform a rhythm pattern, such as 16th notes, for accuracy and speed. MPC Swing, sometimes referred to as “the heart and soul of hip hop,” turns perfectly aligned sequences into beats and patterns with an unmistakable human feel.

Produce, create, and perform with virtually any software on your Mac or PC or other MIDI instruments with the MPK49.

FEATURES

- 49-key semi-weighted keyboard with aftertouch for expressive creativity
- 12 genuine MPC pads with pressure and velocity sensitivity
- MPC pads access four banks each for instant access to 48 samples
- Control 72 software parameters with 24 assignable Q-Link controls and three control banks
- MPC Note Repeat, MPC Swing, and arpeggiator aid in creative process
- Transport controls for use with sequencers and DAWs
- MPC Full Level, MPC 12-Level, Tap Tempo, and Time Division assist with tempo and dynamics
- MIDI output over USB, bus powered, class compliant: plug and play with one USB cable
- Comes with Ableton Live Lite Akai Edition software
- Works with virtually all MIDI recording, sequencing, and performance software
