SMALL CLONE FULL CHORUS

- OPERATION INSTRUCTIONS -

The Small Clone is a compact battery operated Chorus device that features **DEPTH** and **RATE** controls, with an LED function indicator.

To produce the Chorus effect, The Small Clone bends the frequency slightly from the input source and mixes this altered signal with some direct unaffected signal. The combination produces a doubling effect.

For optimum performance, use a 9V battery, although a 9V 100ma tip-positive AC adapter with an 1/8" plug can also be used (not included).

Plug your guitar into the **INPUT** jack and your amp into the **OUTPUT**. Please note that as long as anything is plugged into the **INPUT**, a drain is placed on your battery. It is recommended that you disconnect the **INPUT** when the unit is not in use to increase battery life.

The **DEPTH** switch controls the amount of frequency change that occurs in the altered signal. The rate of alteration between raising and lowering the frequency is controlled by the **RATE** knob.

The red LED indicates when the effect is switched on. The footswitch engages and disengages the Chorus effect.

- WARRANTY INFORMATION -

Please complete and return the enclosed warranty card within 10 days of purchase. We will repair the unit for free within one year of date of purchase. If you should need to return your unit for service within the warranty period, please include a brief description of the problem as well as your name, address, telephone number, copy of your receipt, and a check or money order for \$5.00 shipping and handling to:

Electro-Harmonix
C/O New Sensor Corporation
32-33 47th Avenue
